Education

- *2008 - 2013*: Stanford University, B.A. in Symbolic Systems

Work Experience

- *Fall 2011 - present (7 quarters to date)*: CS106A/B/X Section Leader at Stanford University Computer Science Department — holding office hours, teaching a weekly discussion section, teaching midterm and final exam review sessions, grading of assignments and exams, and in-person code review of students' assignments.
- *Summer 2013*: SDE Intern at Facebook — worked on a data infrastructure project, in Python, with a UI component in PHP.
- *Summer 2012*: SDE Intern at Microsoft — worked on a data infrastructure project, mostly in C++.
- *Summer 2011*: SDE Intern at Seravia, a business analysis company in Beijing, China — worked on several database projects, mostly in Java.
- *Summer 2010*: Intern at Baidu, in Beijing, China — worked on setting up and writing for a new English language blog (non-technical internship).
- *Summer 2009*: Intern at Kemeixin, a college application company in Beijing, China — did research and gave consulting advice to high school students (non-technical internship).

ProCo

- I'm the president of Stanford ProCo, a student group dedicated to furthering high school computer science education in the Bay Area through programming competitions (<http://proco.stanford.edu>). In addition to our work to help local high schools start and run their own competitions, we also host our own annual competition (last year, we had over 400 registrants). My first three years I worked on the puzzle-writing team.
